

TIME MACHINE

NVIDIA — \$100 FROM IPO TO TODAY

\$100 invested at NVIDIA's IPO on January 22, 1999

THE CORE VISUAL RULE

Every year gets a dollar value. The website should literally show the original \$100 moving through time: **1999** → **2000** → **2001** → ... → **2026**. The historical events explain the major rises and falls, but the number is always visible.

\$100.00 → \$921,440.00

The values below use each year's split-adjusted year-end NVIDIA closing price, with the original IPO position fixed at \$12/share. Dividends, taxes and fees are excluded.

ANNUAL MONEY TIMELINE

YEAR	MAJOR MOMENT	\$100 WOULD BE WORTH
1999	START IPO / NVIDIA goes public	\$400
2000	↑ Dot-com boom	\$560
2001	↑ Dot-com crash / recovery	\$2,240
2002	↓ Major post-bubble decline	\$400
2003	↑ Recovery begins	\$760
2004	↑ Gaming / GeForce expansion	\$800
2005	↑ GPU business growth	\$1,200
2006	↑ GeForce era strengthens	\$2,480
2007	↑ CUDA launches	\$3,400
2008	↓ Global financial crisis	\$800
2009	↑ Strong recovery	\$1,880
2010	↓ GPU computing expands	\$1,560
2011	↓ Volatility / pullback	\$1,400
2012	↓ Weak year	\$1,240
2013	↑ Recovery	\$1,600
2014	↑ Maxwell / gaming growth	\$2,000
2015	↑ Strong growth	\$3,280
2016	↑ Pascal + deep learning acceleration	\$10,680
2017	↑ GPU / crypto demand boom	\$19,360
2018	↓ Crypto crash / tech pullback	\$13,360
2019	↑ Recovery	\$23,520
2020	↑ Data center / accelerated computing	\$52,240
2021	↑ AI + data-center expansion	\$117,640
2022	↓ Technology selloff	\$58,440
2023	↑ Generative AI boom	\$198,080
2024	↑ 10-for-1 stock split / AI acceleration	\$537,160

YEAR	MAJOR MOMENT	\$100 WOULD BE WORTH
2025	↑ AI infrastructure expansion	\$746,000
2026	↑ Current value — Sep. 4, 2026	\$921,440

HOW THE NUMBER IS CALCULATED

At the IPO, $\$100 \div \$12 = 8.3333$ shares. NVIDIA's cumulative stock splits turn that into 4,000 split-adjusted shares. The annual values therefore equal $4,000 \times$ the split-adjusted year-end stock price. For example, the 2024 year-end split-adjusted price of \$134.29 gives \$537,160.

Important: 2026 is not a year-end value. It uses NVIDIA's September 4, 2026 closing price of \$230.36, so it should be labelled **2026 — TODAY** in the website rather than pretending the year is finished.

HOW THIS BECOMES THE WEBSITE

The website should not merely list the numbers. The annual values are the backbone of the animation.

The \$100 bill is the protagonist. Each year changes its value. Major historical events appear beside the number to explain why it moved.

SOURCE NOTE

Annual split-adjusted year-end prices are based on historical NVIDIA price data reported by Wall Street Numbers and StatMuse; NVIDIA's IPO price and stock-split history should be cross-checked against NVIDIA investor materials before production. The current 2026 closing price is \$230.36 as of September 4, 2026.
